- Age: 28

Current position

Localization Test Development Engineer (TDE)

At my current assignment I'm responsible for:

- guarantee fully localized and functional product delivery (FIGSJKST + EE languages)
- report to PM in terms of QA status
- cooperate with core product development team
- schedule and resources allocation to fit into proposed RTM dates
- coordinate QA staff amongst different time zones (usually multiple time zones – USA/Europe/Japan)
- control and analyze defect tracking system
- deal with specific requests by respective country offices/partners
- globalization testkit creation
- localization testkit creation
- automation scripts preparation using Silk Test (Visual 4 Test) and/or using scripting languages like Perl
